

REACH Article 33 Disclosure

9180-0053 August 2022

The European Union's REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) regulation sets compliance requirements for manufacturers, importers, and downstream users of chemicals, including chemicals contained in articles and preparations, that are imported into the EU for distribution, sale, or use by third parties.

Under REACH Article 33, Gill is required to disclose the presence of Substances of Very High Concern (SVHCs) to downstream users if present in Gill products that are imported into the EU in a concentration that exceeds 0.1% w/w per Article. Gill is also required to disclose SVHCs that are present in products to consumers within 45 days of request.

Below are the Article 33 disclosures for Gill Instruments products:

SVHC	CAS Number	Location of SVHC	RoHS Exemption
Lead	7439-92-1	Lead in single crystal piezoelectric materials for ultrasonic transducers. Internal parts that are not accessible without disassembly of the product.	2011/65/EU Annex IV section 'Other', item 14
Lead	7439-92-1	Lead in solders for bonding to ultrasonic transducers. Internal parts that are not accessible without disassembly of the product.	2011/65/EU Annex IV section 'Other', item 15
Lead	7439-92-1	Copper alloy containing lead. Contained in fasteners including screws, nuts, washers, pillars, spacers, threaded inserts; Connectors and terminals/contacts	2011/65/EU Annex III 6 (c)
